Disclosure pertaining to Liquidity Coverage Ratio (LCR):

RBI vide circular dated November 4, 2019 issued the guidelines covering liquidity risk management for all non-deposit taking NBFCs with asset size of Rs.10,000 crore and above. The guidelines aim to maintain a liquidity buffer in terms of LCR by ensuring that they have sufficient High Quality Liquid Asset (HQLA) to survive any acute liquidity stress scenario lasting for next 30 days. HQLA are defined by RBI as the liquid assets that can be readily sold or immediately convertible into cash at little/no loss of value or can be used as collateral to obtain funds in stress situations.

As per the guidelines, the LCR requirement shall be binding on NBFCs from December 1, 2020. From December 1, 2020, the minimum HQLAs to be held being 50% of the LCR, progressively reaching up to the required level of 100% by December 1, 2024. Further, minimum LCR of 85% has been prescribed by RBI to be held as on December 1, 2023.

As evident, currently IIFCL's liquidity coverage ratio is as per the regulatory limits of 85%.
